Properties

Style	Duranite Oil	Style Code	SPG906
Style Description			
The SPG906 Duranite Oil Glove is engineered for professionals who work in heavy, oil-rich environments and require dependable, long-lasting hand protection. Built with a durable dual-layer nitrile coating, this glove excels where grip, control, and resistance to oil penetration are essential. The primary nitrile layer creates a robust barrier that keeps hands dry and shielded from oils and contaminants. A secondary specialist coating enhances surface traction, delivering exceptional grip and stable handling of tools and materials, even in extremely oily conditions. Balancing protection with dexterity, the SPG906 allows users to maintain precision and control while benefiting from a glove designed for tough, demanding tasks. Its reliable performance makes it a trusted choice across automotive, engineering, manufacturing, and industrial environments. Certified to EN388: 4131A for mechanical protection and EN407: X1XXXX for heat resistance, the SPG906 provides confidence in both safety and durability.
